lccsm.ado -- Data format

Roseanne McNamee, Matthew Carr 12oct2013

The data should be provided in the standard format for survival analysis with a time-dependent variable (longitvar); i.e. the data should be ready to be set with Stata's stset command.

Example

id	treatment	observation	start	end	longitvar	covariate1	covariate2	eventvar
1	2	1	0	0.057	184	0	72.868	0
1	2	2	0.057	0.096	165	0	72.868	0
1	2	3	0.096	0.172	154	0	72.868	0
1	2	4	0.172	0.227	153	0	72.868	0
1	2	5	0.227	0.498	172	0	72.868	0
1	2	6	0.498	0.767	157	0	72.868	0
1	2	7	0.767	1.073	156	0	72.868	1
2	0	1	0	0.057	179	1	73.818	0
2	0	2	0.057	0.096	170	1	73.818	0
2	0	3	0.096	0.170	164	1	73.818	0
2	0	4	0.170	0.233	154	1	73.818	0
2	0	5	0.233	0.517	190	1	73.818	0
2	0	6	0.517	0.767	188	1	73.818	0
2	0	7	0.767	0.997	180	1	73.818	0
