**Planta (2003) 218:107–114**

Owing to an unfortunate oversight, Fig. 4 was omitted and replaced by a second copy of Fig. 3.

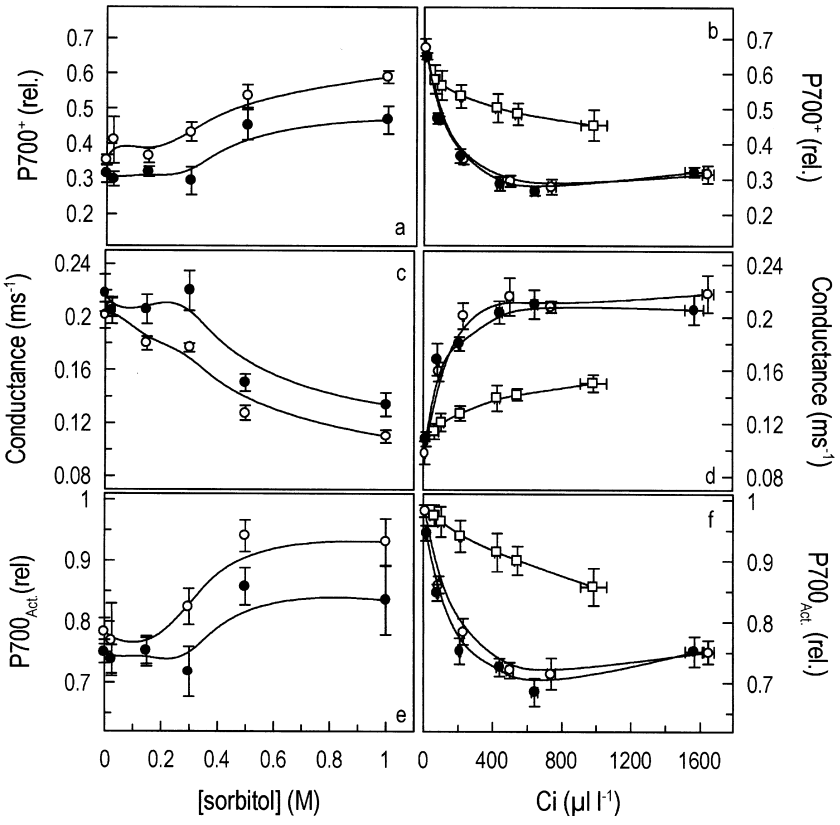

**Fig. 4a–f** PSI parameters in barley plants subjected to varying degrees of drought (**a, c, e**) and various $CO_2$ concentrations (**b, d, f**). **a, c, e** *Open circles* plants supplied with an external $CO_2$ concentration of 2,000 µl $l^{-1}$, *closed circles* 360 µl $l^{-1}$. **b, d, f** *Open circles* control plants, *closed circles* plants subjected to 0.15 M sorbitol, *open squares* 0.5 M sorbitol. Means ± SE of at least 4 replicates
