

Editor - Professor Jeremy W. Crampton

Professor Crampton's research interests centre on the politics of identity, critical approaches to cartography and GIS, biopolitics and race, and the work of Michel Foucault. His recent publications include articles in *Progress in Human Geography*, *Environment and Planning D, Social and Cultural Geography*, and *Cartographica*. His book *The Political Mapping of Cyberspace* was published by the University of Chicago Press in 2004. His latest book is *Space, Knowledge and Power: Foucault and Geography* (Ashgate Press, 2007), co-edited with Stuart Elden. He also produces a quarterly column for *GeoWorld*, the industry GIS magazine.

Rina Ghose - University of Milwaukee, USA
Amy Griffin - University of New South Wales, Australia
Mark Harrower - University of Wisconsin, USA
Lorenz Hurni - Federal Institute Of Technology, Switzerland
Menno-Jan Kraak - ITC, The Netherlands
John Krygier - Ohio Wesleyan University, USA
Margaret Pearce - Ohio University, USA
John Pickles - University of North Carolina, USA
Nadine Schuurman - Simon Fraser University, Canada
Julia Siemer - University of Regina, Canada
Denis Wood - Independent scholar, USA

Submissions

Cartographica publishes original manuscripts of both article and monograph length, covering a full range of cartographic topics that include at least a technical or cultural emphasis and represent work in the history of cartography, symbolization and map use, geovisualization, and geographic information. *Cartographica* encourages international contributions. Publication is in either French or English. Abstracts appear in both English and French.

Cartographica welcomes commentaries discussing issues of general cartographic interest. The journal is also open to commentaries relating to published articles. In such cases, the contribution will be sent to the author of the original article so that a response can be published simultaneously. *Cartographica* also carries reviews of atlases, maps, books, and Web sites on cartographic subjects, both historical and modern.

cartographica

the international journal for geographic information and geovisualization

cartographica

the international journal for geographic information and geovisualization

Cartographica is dedicated to publishing articles on all aspects of cartographic and geovisualization research while maintaining its tradition of publishing material on cartographic thought, the history of cartography, and cartography and society.

Cartographica delivers in-depth research and writing covering a wide range of cartographic studies, including the production, design, use, and cognitive understanding of maps, the history of maps, and geographic information systems. *Cartographica* publishes abstracts in French and English.

Each volume of *Cartographica* comprises four issues: two or three regular issues and one or two special-topic monographs. These special monograph issues, accommodating book-length manuscripts, provide an extensive look at one particular area of cartography. The regular issues also include strong reviews of reference books and atlases as well as listings of recent cartographic literature from around the world.

Published quarterly by the University of Toronto Press.
ISSN: 0317-7173.

Top Ten Classic *Cartographica* Articles Now Free Online

The top ten most-cited articles in the history of *Cartographica* are now freely available online.

The papers represent a wide range of cartographic interests and include work by many influential writers, such as

1. J.B. Harley, "Deconstructing the Map,"
Cartographica 26/2 (1989): 1–20.

2. D.M. Mark "Automated Detection of Drainage Networks From Digital Elevation Models,"
Cartographica 21/2&3 (1984): 168–178.

3. G. Langran and N.R. Chrisman, "A Framework for Temporal Geographic Information,"
Cartographica, 25/3 (1988): 1–14.

CARTOGRAPHICA IS NOW ONLINE
<http://utpjournals.metapress.com>

Cartographica is now available electronically and includes the complete back file of previously published articles, going back to issue 1.1, when *Cartographica* was known as *The Cartographer*. In addition to the substantial back file and current issues, the *Cartographica* Online site has all the features that users and librarians look for in an electronic resource, including full searching (full text, Boolean, relevancy ranking, and persistent keyword searching), quick searching (single field, single button, automatic recognition of ISSN and DOI), advanced searching (citation text, publication, subjects, or content types), search results (summaries, dimensional navigation, abstracts, citation or tabular results, search within results, filter selected items), parent list navigation, publication metadata, TOC alerting, forward reference linking, and link exports.

For librarians, our system simplifies access management, linking, and usage reporting with powerful yet easy-to-use administration tools. Support for established and emerging standards, such as OpenURL and COUNTER, enables seamless integration with existing library systems.
