

R.F. BISHOP:
LIST OF PUBLICATIONS

1. **R.F. Bishop**
The Binding Energy of a Λ -Particle in Nuclear Matter: A Comparison of Two Formulations,
Nucl. Phys. **B17** (1970), 573–598
2. **Raymond Francis Bishop**
On the Theory of Interacting Fermi Systems,
Ph.D. Thesis, Stanford University, (1972)
3. **R.F. Bishop**
Two-Body Scattering with Singular Potentials,
Phys. Rev. C **7** (1973), 479–488
4. **R.F. Bishop**
Ground-State Energy of a Dilute Fermi Gas,
Ann. Phys. (NY) **77** (1973), 106–138
5. **R.F. Bishop**
On the Ground State of an Impurity in a Dilute Fermi Gas,
Ann. Phys. (NY) **78** (1973), 391–420
6. **R.F. Bishop**
Critical Behavior of a Charged Bose Gas,
J. Low Temp. Phys. **15** (1974), 601–635
7. **R.F. Bishop, M.R. Strayer and J.M. Irvine**
Singularities in the Galitskii-Feynman T-Matrix,
Phys. Rev. A **10** (1974), 2423–2429
8. **R.F. Bishop, M.R. Strayer and J.M. Irvine**
Bound-State Pairing Singularities in the ^3He Galitskii-Feynman T-Matrix: Temperature Dependence,
J. Low Temp. Phys. **20** (1975), 573–584
9. **J.C. Owen, R.F. Bishop and J.M. Irvine**
Constrained Jastrow Calculations,
Phys. Lett. **59B** (1975), 1–3
10. **H.B. Ghassib, R.F. Bishop and M.R. Strayer**
A Study of the Galitskii-Feynman T-Matrix for Liquid ^3He ,
J. Low Temp. Phys. **23** (1976), 393–410
11. **J.C. Owen, R.F. Bishop and J.M. Irvine**
A Variational Calculation of Nuclear Matter Binding with the Reid Potential,
Phys. Lett. **61B** (1976), 147–150
12. **R.F. Bishop, H.B. Ghassib and M.R. Strayer**
Composite Pairs and Effective Two-Body Scattering in a Many-Body Medium,
Phys. Rev. A **13** (1976), 1570–1580
13. **R.F. Bishop**
The Bethe-Goldstone Equation with Singular Interactions: A Fully Off-Shell Solution for the Boundary Condition Model,
Ann. Phys. (NY) **99** (1976), 318–354
14. **M.A.Z. Habib, R.F. Bishop, J.M. Irvine and M.R. Strayer**
A Two Fluid Model for Nuclear Rotations,
Nucl. Phys. **A272** (1976), 174–188

15. **J.C. Owen, R.F. Bishop and J.M. Irvine**
Constrained Variation in Jastrow Method at High Density,
Ann. Phys. (NY) **102** (1976), 170–188
16. **J.C. Owen, R.F. Bishop and J.M. Irvine**
Model Nuclear Matter Calculations with a New Fermion Lowest Order Constrained Variational Method,
Nucl. Phys. **A274** (1976), 108–124
17. **J.C. Owen, R.F. Bishop and J.M. Irvine**
A Variational Approach to Nuclear Matter with Realistic Potentials,
Nucl. Phys. **A277** (1977), 45–68
18. **R.F. Bishop and M.R. Strayer**
Quasiparticle Pairing at Arbitrary Densities: A Soluble Model,
J. Phys. G: Nucl. Phys. **3** (1977), L13–L18
19. **J.C. Owen, R.F. Bishop and J.M. Irvine**
The Equation of State for a Model Fermi Fluid,
Phys. Lett. **66B** (1977), 25–28
20. **R.F. Bishop, H.B. Ghassib and M.R. Strayer**
Low-Energy He-He Interactions with Phenomenological Potentials,
J. Low Temp. Phys. **26** (1977), 669–690
21. **M.A.Z. Habeeb, R.F. Bishop, J.M. Irvine and M.R. Strayer**
A Two-Fluid Model for Backbending,
J. Phys. G: Nucl. Phys. **3** (1977), L93–L97
22. **C. Howes, J.M. Irvine and R.F. Bishop**
Constrained Variational Results for the New Bethe Homework Problem,
J. Phys. G: Nucl. Phys. **4** (1978), L45–L49
23. **M.A.Z. Habeeb, R.F. Bishop, J.M. Irvine and M.R. Strayer**
A Two-Fluid Model of Nuclear Rotations and Surface Vibrations,
J. Phys. G: Nucl. Phys. **4** (1978), 857–869
24. **C. Howes, R.F. Bishop and J.M. Irvine**
A Constrained Variational Calculation of the Symmetry Coefficient,
J. Phys. G: Nucl. Phys. **4** (1978), L81–L86
25. **R.F. Bishop and K.H. Lührmann**
Electron Correlations: I. Ground-State Results in the High-Density Regime,
Phys. Rev. B **17** (1978), 3757–3780
26. **C. Howes, R.F. Bishop and J.M. Irvine**
A Constrained Variational Calculation for Beta-Stable Matter,
J. Phys. G: Nucl. Phys. **4** (1978), L123–L126
27. **M. Modarres, J.M. Irvine and R.F. Bishop**
The Saturating Effect of $N^(1234)$ on the Binding of Light Nuclei,*
J. Phys. G: Nucl. Phys. **4** (1978), L127–L133
28. **R.F. Bishop, C. Howes, J.M. Irvine and M. Modarres**
Constrained Variational Calculations for Finite Nuclei,
J. Phys. G: Nucl. Phys. **4** (1978), 1709–1723
29. **R.F. Bishop**
Coupled Clusters and Coulomb Correlations,
in “Recent Progress in Many-Body Theories,” (eds. J.G. Zabolitzky, M. de Llano, M. Fortes and J.W. Clark), Lecture Notes in Physics Vol. **142**, Springer-Verlag, Berlin, (1981), 111–120
30. **R.F. Bishop and K.H. Lührmann**
Coupled Clusters and the One-Component Bose Plasma,
Physica **108B** (1981), 1383–1384

31. **R.F. Bishop and K.H. Lührmann**
Coupled Clusters and the Electron Gas at Metallic Densities,
Physica **108B** (1981), 873–874
32. **R.F. Bishop and K.H. Lührmann**
Electron Correlations. II. Ground-State Results at Low and Metallic Densities,
Phys. Rev. B **26** (1982), 5523–5557
33. **R.F. Bishop**
Some Recent Developments in Coupled Cluster Theory,
in “Methods for the Many-Body Problem,” (Proc. of the 6th Pan-American Workshop on Condensed Matter Theories), (eds. J.M.C. Chen, J.W. Clark and P. Suntharothok-Priesmeyer), Washington University, St. Louis, (1982), 126–130
34. **R.F. Bishop**
A Coupled-Cluster Analysis of One-Component Coulomb Plasmas,
in Proc. of the 7th (Pan-American) Workshop on Condensed Matter Theories, (ed. J.G. Zabolitzky), Universität zu Köln, (1983), 1–6
35. **R.F. Bishop**
Sum Rules and a Coupled Cluster Formulation of Linear Response Theory,
in “Recent Progress in Many-Body Theories,” (eds. H. Kümmel and M.L. Ristig), Lecture Notes in Physics Vol. **198**, Springer-Verlag, Berlin, (1984), 310–318
36. **W. Piechocki, R.F. Bishop and G.A. Stevens**
Correlated Pairs Near the Fermi Surface,
in “Recent Progress in Many-Body Theories,” (eds. H. Kümmel and M.L. Ristig), Lecture Notes in Physics Vol. **198**, Springer-Verlag, Berlin, (1984), 110–112
37. **R.F. Bishop**
Linear Response and Sum Rules in the Coupled-Cluster Formalism,
in “Nucleon-Nucleon Interaction and Nuclear Many-Body Problems,” (eds. S.S. Wu and T.T.S. Kuo), World Scientific, Singapore, (1984), 604–617
38. **A. Vourdas and R.F. Bishop**
Quantum Tunnelling in the Deformed Region of the LMG Model,
J. Phys. G: Nucl. Phys. **11** (1985), 95–101
39. **R.F. Bishop**
Pairing Correlations, Composite Pairs, Coupled Clusters and All That,
An. fıs., Ser. A: Fenóm. inter. **81** (1985), 9–16
40. **J. Adam, M. Znojil and R.F. Bishop**
On the Coulomb Plus Separable Model of Quarkonium,
in Proc. of the Conf. “Hadron Structure 83” (Smolenice, Czechoslovakia; 14-18 November 1983), (ed. I. Lukáč), Physics and Applications Vol. **12**, VEDA Publ. Co., Bratislava, (1985), 319–322
41. **R.F. Bishop and J. Dąbrowski**
On the Σ -Hypernuclear States in (K^-, π^\pm) Reactions on ^{12}C ,
J. Phys. G: Nucl. Phys. **12** (1986), L63–L65
42. **R.F. Bishop and A. Vourdas**
Generalised Coherent States and Bogoliubov Transformations,
J. Phys. A: Math. Gen. **19** (1986), 2525–2536
43. **R.F. Bishop and A. Vourdas**
Pairing Correlations, Coherent States, and Black Holes,
in “Condensed Matter Theories,” Vol. **1**, (ed. F.B. Malik), Plenum, New York, (1986), 19–31
44. **R.F. Bishop**
Quantum Theory of Finite Systems,
Contemp. Phys. **27** (1986), 553–555
45. **Raymond F. Bishop and Hermann G. Kümmel**
The Coupled-Cluster Method,
Phys. Today **40** (No.3) (1987), 52–60

46. **R.F. Bishop**
Towards a Universal Coupled Cluster Methodology for the Various Phases of Condensed Matter Systems,
in “Recent Progress in Many-Body Theories,” (eds. P.J. Siemens and R.A. Smith), Texas A & M University, College Station, (1987), 1–12
47. **J. Arponen, R.F. Bishop and E. Pajanne**
On an Effective Gauge Field Description of a Positron Impurity in Polarizable Media,
in “Condensed Matter Theories”, Vol. **2**, (eds. P. Vashishta, R.K. Kalia and R.F. Bishop), Plenum, New York, (1987), 373–387
48. **J. Arponen, R.F. Bishop and E. Pajanne**
Extended Coupled Cluster Method: Quantum Many-Body Theory Made Classical,
in “Condensed Matter Theories,” Vol. **2**, (eds. P. Vashishta, R.K. Kalia and R.F. Bishop), Plenum, New York, (1987), 357–372
49. **R.F. Bishop and A. Vourdas**
A New Coherent Paired State with Possible Applications to Fluctuation-Dissipation Phenomena,
J. Phys. A: Math. Gen. **20** (1987), 3727–3741
50. **R.F. Bishop and A. Vourdas**
Coherent Mixed States and a Generalised P Representation,
J. Phys. A: Math. Gen. **20** (1987), 3743–3769
51. **R.F. Bishop and W.A. Lahoz**
Two-Component Fermi Systems. I. Fluid Coupled Cluster Theory,
J. Phys. A: Math. Gen. **20** (1987), 4203–4236
52. **J.S. Arponen, R.F. Bishop and E. Pajanne**
Extended Coupled-Cluster Method. I. Generalized Coherent Bosonization as a Mapping of Quantum Theory into Classical Hamiltonian Mechanics,
Phys. Rev. A **36** (1987), 2519–2538
53. **J.S. Arponen, R.F. Bishop and E. Pajanne**
Extended Coupled-Cluster Method. II. Excited States and Generalized Random-Phase Approximation,
Phys. Rev. A **36** (1987), 2539–2549
54. **Raymond F. Bishop and Hermann G. Kümmerl**
(in Japanese –)
Confronting the Many-Body Problem: The Effectiveness of the Coupled Cluster Method,
Parity **2** (No. 12) (1987), 14–25
55. **J. Arponen, R.F. Bishop, E. Pajanne and N.I. Robinson**
Towards a Coupled Cluster Gauge-Field Approach to Quantum Hydrodynamics,
in “Condensed Matter Theories,” Vol. **3**, (eds. J.S. Arponen, R.F. Bishop and M. Manninen), Plenum, New York, (1988), 51–66
56. **R.F. Bishop**
Correlated Basis Functions and All That,
in “Recent Progress in Many-Body Theories,” Vol. **1**, (eds. A.J. Kallio, E. Pajanne and R.F. Bishop), Plenum, New York, (1988), 385–393
57. **J. Arponen, R.F. Bishop, E. Pajanne and N.I. Robinson**
Extended Coupled-Cluster Method. III. Zero-temperature Hydrodynamics of a Condensed Bose Fluid,
Phys. Rev. A **37** (1988), 1065–1086
58. **R.F. Bishop, W. Piechocki and G.A. Stevens**
Pairing Correlations: I. The Ground-State Coupled-Cluster Formalism as a Unifying Approach,
Few-Body Syst. **4** (1988), 161–177

59. **R.F. Bishop, W. Piechocki and G.A. Stevens**
Pairing Correlations: II. Exact Model Ground-State Results for Generalised Ladders,
Few-Body Syst. **4** (1988), 179–209
60. **R.F. Bishop and A. Vourdas**
General Two-Mode Squeezed States,
Z. Phys. B: Condens. Matter **71** (1988), 527–529
61. **M. Znojil, M.F. Flynn and R.F. Bishop**
The Triple Problem of Convergence in the Perturbation Expansions with Non-Diagonal Propagators,
in *Proc. of the Conf. “Hadron Structure 87”* (Smolenice, Czechoslovakia; 16-20 November 1987),
(ed. D. Krupa), *Physics and Applications Vol. 14*, VEDA Publ. Co., Bratislava, (1988), 252–256
62. **R.F. Bishop**
Path Integrals and Condensed Matter Physics,
Contemp. Phys. **29** (1988), 499–502
63. **R.F. Bishop and M.F. Flynn**
Variational and Coupled-Cluster Calculations of the Spectra of Anharmonic Oscillators,
Phys. Rev. A **38** (1988), 2211–2232
64. **R.F. Bishop, M.C. Boscá and M.F. Flynn**
An Energy-Replicating Class of Non-Normalisable Supercoherent States,
Phys. Lett. A **132** (1988), 440–444
65. **W.A. Lahoz and R.F. Bishop**
Two-Component Fermi Systems: II. Superfluid Coupled Cluster Theory,
Z. Phys. B: Condens. Matter **73** (1988), 363–375
66. **A. Vourdas and R.F. Bishop**
Phase-Admixed States: Coherence and Incoherence,
Phys. Rev. A **39** (1989), 214–220
67. **R.F. Bishop, J. Arponen and E. Pajanne**
Dynamic Variational Principles and Extended Coupled Cluster Techniques,
in “*Aspects of Many-Body Effects in Molecules and Extended Systems,*” (ed. D. Mukherjee),
Lecture Notes in Chemistry Vol. 50, Springer-Verlag, Berlin, (1989), 79–100
68. **R.F. Bishop, N.I. Robinson, J. Arponen and E. Pajanne**
Quantum Fluid Dynamics: An Extended Coupled Cluster Treatment,
in “*Aspects of Many-Body Effects in Molecules and Extended Systems,*” (ed. D. Mukherjee),
Lecture Notes in Chemistry Vol. 50, Springer-Verlag, Berlin, (1989), 241–260
69. **R.F. Bishop**
Statistical Field Theory,
Contemp. Phys. **30** (1989), 137–140
70. **R.F. Bishop, M.F. Flynn and M. Znojil**
Perturbation Theory Without Unperturbed Solutions,
Phys. Rev. A **39** (1989), 5336–5349
71. **R.F. Bishop, M.F. Flynn and M. Znojil**
Rayleigh-Schrödinger Perturbation Theory Revisited and Extended,
in “*Condensed Matter Theories,*” Vol. **4**, (ed. J. Keller), Plenum, New York, (1989), 43–55
72. **R.F. Bishop, M.C. Boscá and M.F. Flynn**
Nonuniqueness in the Energy Spectra of Anharmonic Oscillators Using the Coupled-Cluster Method,
Phys. Rev. A **40** (1989), 3484–3497
73. **N.I. Robinson, R.F. Bishop and J. Arponen**
Extended Coupled-Cluster Method. IV. An Excitation Energy Functional and Applications to the Lipkin Model,
Phys. Rev. A **40** (1989), 4256–4276

74. **R.F. Bishop, M.F. Flynn, M.C. Boscá and R. Guardiola**
Paths to Optimization in the Multistate Rayleigh-Ritz Variational Method: Applications to the Double-Well Quantum Anharmonic Oscillator,
 Phys. Rev. A **40** (1989), 6154–6168
75. **J.S. Arponen and R.F. Bishop**
Holomorphic Representation of a Set of Supercoherent Canonical Coordinates for a Quantum Oscillator with x^{2K} Anharmonicity,
 Phys. Rev. Lett. **64** (1990), 111–114
76. **R.F. Bishop, M.F. Flynn, M.C. Boscá, E. Buendía and R. Guardiola**
On Large-Scale Shell-Model Calculations in ^4He ,
 J. Phys. G: Nucl. Part. Phys. **16** (1990), L61–L66
77. **R.F. Bishop**
Quantum Many-Particle Systems,
 Contemp. Phys. **31** (1990), 131–134
78. **R.F. Bishop, M.F. Flynn, M.C. Boscá, E. Buendía and R. Guardiola**
Exploring Many-Body Theories in Light Nuclei,
 in “The Nuclear Equation of State, Part A: Discovery of Nuclear Shock Waves and the EOS,”
 (eds. W. Greiner and H. Stöcker), Plenum, New York, (1990), 605–614
79. **R.F. Bishop, M.F. Flynn, M.C. Boscá, E. Buendía and R. Guardiola**
Translationally-Invariant Coupled Cluster Theory Applied to the ^4He Nucleus,
 in “Condensed Matter Theories,” Vol. **5**, (ed. V.C. Aguilera-Navarro), Plenum, New York,
 (1990), 253–263
80. **E. Aalto, J.S. Arponen and R.F. Bishop**
On the Bargmann Space Approach to the Extended Coupled Cluster Method for Simple Anharmonic Systems,
 in “Condensed Matter Theories,” Vol. **5**, (ed. V.C. Aguilera-Navarro), Plenum, New York,
 (1990), 295–308
81. **R.F. Bishop, N.I. Robinson and J. Arponen**
Extended Coupled Cluster Techniques for Excited States: Applications to Quasispin Models,
 in “Condensed Matter Theories,” Vol. **5**, (ed. V.C. Aguilera-Navarro), Plenum, New York,
 (1990), 327–340
82. **R.F. Bishop, M.F. Flynn, M.C. Boscá, E. Buendía and R. Guardiola**
Translationally Invariant Coupled Cluster Theory for Simple Finite Systems,
 Phys. Rev. C **42** (1990), 1341–1360
83. **Raymond F. Bishop and Jouko S. Arponen**
Correlations in Extended Systems: A Microscopic Multilocal Method for Describing Both Local and Global Properties,
 Int. J. Quantum Chem.: Quantum Chem. Symp. **24** (1990), 197–211
84. **J.S. Arponen and R.F. Bishop**
Coupled Cluster Parametrizations of Model Field Theories and Their Bargmann-Space Representations,
 in “Recent Progress in Many-Body Theories,” Vol. **2**, (ed. Y. Avishai), Plenum, New York,
 (1990), 193–207
85. **J.S. Arponen and R.F. Bishop**
Independent-Cluster Parametrizations of Wave Functions in Model Field Theories. I. Introduction to Their Holomorphic Representations,
 Ann. Phys. (NY) **207** (1991), 171–217
86. **R.F. Bishop, E. Buendía, M.F. Flynn and R. Guardiola**
Independent Clusters in Coordinate Space: An Efficient Alternative to Shell-Model Expansions,
 J. Phys. G: Nucl. Part. Phys. **17** (1991), 857–864

87. **R.F. Bishop, J.B. Parkinson and Yang Xian**
Many-Body Correlations in Quantum Antiferromagnets: A Microscopic Coupled-Cluster Approach,
Phys. Rev. B **43** (1991), 13782–13785 [Rapid Communication]
88. **R.F. Bishop, J.B. Parkinson and Yang Xian**
Quantum Spin Lattice Models: A Coupled-Cluster Treatment,
in “Condensed Matter Theories,” Vol. **6**, (eds. S. Fantoni and S. Rosati), Plenum, New York, (1991), 37–62
89. **R.F. Bishop, E. Buendía, M.F. Flynn and R. Guardiola**
Variational Cluster Methods in Coordinate Space for Small Systems: Center of Mass Corrections Made Easy,
in “Condensed Matter Theories,” Vol. **6**, (eds. S. Fantoni and S. Rosati), Plenum, New York, (1991), 405–416
90. **R.F. Bishop**
An Overview of Coupled Cluster Theory and its Applications in Physics,
Theor. Chim. Acta **80** (1991), 95–148
91. **R.F. Bishop, J.B. Parkinson and Yang Xian**
A Coupled-Cluster Study of the Ground-State Energy and Properties of an Anisotropic Quantum Spin Lattice Model Exhibiting Antiferromagnetism in Various Phases,
Theor. Chim. Acta **80**(1991), 181–205
92. **Jouko S. Arponen and Raymond F. Bishop**
A Holomorphic Representation Approach to the Regularization of Model Field Theories in Coupled Cluster Form,
Theor. Chim. Acta **80** (1991), 289–305
93. **R.F. Bishop, J.B. Parkinson and Yang Xian**
Coupled-Cluster Treatments of Correlations in Quantum Antiferromagnets,
Phys. Rev. B **44** (1991), 9425–9443
94. **R.F. Bishop, E. Buendía, M.F. Flynn and R. Guardiola**
Diffusion Monte Carlo Determination of the Binding Energy of the ^4He Nucleus for Model Wigner Potentials,
J. Phys. G: Nucl. Part. Phys. **18** (1992), L21–L27
95. **R.F. Bishop, E. Buendía, M.F. Flynn, and R. Guardiola**
Translationally Invariant Clusters in Coordinate Space: An Euler-Lagrange Approach,
J. Phys. G: Nucl. Part. Phys. **18** (1992), 1157–1176
96. **R.F. Bishop, J.B. Parkinson and Yang Xian**
Correlations in Quantum Spin Chains and Lattices: A Fully Microscopic Many-Body Approach,
in “Recent Progress in Many-Body Theories,” Vol. **3**, (eds. T.L. Ainsworth, C.E. Campbell, B.E. Clements and E. Krotscheck), Plenum, New York, (1992), 117–133
97. **R.F. Bishop, J.B. Parkinson and Yang Xian**
A Systematic Localized Approximation Scheme for the Coupled-Cluster Treatment of Quantum Spin Systems,
J. Phys.: Condens. Matter **4** (1992), 5783–5794
98. **R.F. Bishop, J.B. Parkinson and Yang Xian**
Coupled-Cluster Calculations of Quantum XXZ Models with a General Spin,
Phys. Rev. B **46** (1992), 880–888
99. **Raymond F. Bishop**
The Coupled Cluster Method: Theory and Applications to Quantum Many-Body and Field-Theoretic Systems,
in “Dirkfest ’92 – A Symposium in Honor of J. Dirk Walecka’s Sixtieth Birthday,” (eds. W.W. Buck, K.M. Maung and B.D. Serot), World Scientific, Singapore, (1992), 21–43

100. **R.F. Bishop and Y. Xian**
A Systematic Coupled-Cluster Calculation of the Ground State of U(1) Lattice Gauge Models in (1 + 1) and (2 + 1) Dimensions,
Acta Phys. Pol. B **24** (1993), 541–555
101. **R.F. Bishop, A.S. Kendall, L.Y. Wong and Yang Xian**
A Coupled Cluster Study of Abelian Lattice Gauge Field Theories,
 in “Condensed Matter Theories,” Vol. **8**, (eds. L. Blum and F.B. Malik), Plenum, New York, (1993), 269–290
102. **R.F. Bishop, A.S. Kendall, L.Y. Wong and Y. Xian**
Correlations in Abelian Lattice Gauge Field Models: A Microscopic Coupled-Cluster Treatment,
Phys. Rev. D **48** (1993), 887–901
103. **R.F. Bishop, E. Buendía, M.F. Flynn and R. Guardiola**
Translationally Invariant Clusters in Coordinate Space: Higher-Order Clusters and the Gaussian Expansion Basis,
J. Phys. G: Nucl. Part. Phys. **19** (1993), 1163–1178
104. **J.S. Arponen and R.F. Bishop**
Independent-Cluster Parametrizations of Wave Functions in Model Field Theories. II. Classical Mappings and their Algebraic Structure,
Ann. Phys. (NY) **227** (1993), 275–333
105. **J.S. Arponen and R.F. Bishop**
Independent-Cluster Parametrizations of Wave Functions in Model Field Theories. III. The Coupled-Cluster Phase Spaces and their Geometrical Structure,
Ann. Phys. (NY) **227** (1993), 334–380
106. **R.F. Bishop, J.B. Parkinson and Yang Xian**
The Spin-One Heisenberg-Biquadratic Quantum Spin Chain Treated by the Coupled-Cluster Method,
J. Phys.: Condens. Matter **5** (1993), 9169–9184
107. **R.F. Bishop and Y. Xian**
A Many-Body Approach to Hamiltonian Lattice Gauge Field Theories,
Nucl. Phys. B (Proc. Suppl.) **34** (1994), 808–810
108. **Raymond F. Bishop**
From Interacting Nucleons to Hamiltonian Lattice Gauge Theories: A Unified Many-Body Treatment,
 in “Many-Body Physics,” (eds. C. Fiolhais, M. Fiolhais, C. Sousa and J.N. Urbano), World Scientific, Singapore, (1994), 3–19
109. **R.F. Bishop and Y. Xian**
A Unified Many-Body Theory of Hamiltonian Lattice Systems,
 in “Condensed Matter Theories,” Vol. **9**, (eds. J.W. Clark, K.A. Shoaib and A. Sadiq), Nova Science Publ., Commack, New York, (1994), 433–457
110. **A. Vourdas and R.F. Bishop**
Thermal Coherent States in the Bargmann Representation,
Phys. Rev. A **50** (1994), 3331–3339
111. **Raymond F. Bishop and Yang Xian**
The Coupled Cluster Theory of Quantum Lattice Systems,
Int. J. Quantum Chem.: Quantum Chem. Symp. **28** (1994), 155–172
112. **R.F. Bishop and A. Vourdas**
