# Final Year Project: Final Report Comment Sheet

Louise Dennis

October 27, 2004

## 1 Project Description

- Is there a basic description of the project that anyone could understand?

- Is it clear what the project's aims are?

- Is the description accurate?

- Is the description complete?

- Has the project description been elaborated into a clear description of what the program will do.

- Has any market research been undertaken (if relevant)?

- Is there a clear description of what the program associated with the project does that anyone could understand?

### 1.1 Comments

## 2 Reading

- Is there evidence of backround reading relating to the subject matter of the project?

- Is the content of this reading clearly explained?

- Is there any survey of similar programs or alternative techniques?

- Is it clear what these other programs do?

- Is it clear how the project will be different from these other programs (if relevant)?

- Is there a discussion of hardware (where relevant) and software choice?

- Is this discussion clear?

- Are the hardware and software choices sensible?

- Are the hardware and software choices justified in the report?

- Are there any obvious omissions from the project reading?

## 2.1 Comments

# 3 Program Architecture, Design and Rapid Prototype

- Is there a description of some sort of high-level architecture or design for the program.

- Is this clearly presented and explained?

- Is it appropriate to the project?

- Is there a design or description of a rapid prototype (or both)?

## 3.1 Comments

# 4 Implementation

- Is there a discussion of the implementation of a program?

- Is it clear from the discussion what the main technical issues were that were faced by the programmer?

- Is it clear how the main algorithms involved work?

- Is there a discussion of the creation of a user interface for the project?

- Is the user interface well-designed?

- Does the implementation match the specification if not are the differences discussed?

- Does the implementation differ from the design or rapid prototype if so are the differences discussed?

## 4.1  Comments

# 5  Technical Merit

- How technically ambitious was the project?

- How well have the project's ambitions been met?

## 5.1  Comments

# 6  Evaluation

- Is it made clear how the writer decided whether or not their project aims had been met?

- Is there a clear plan for testing the resulting program?

- Are the results of testing discussed?

- Is there a discussion of further work to be undertaken?

- Is this discussion justified by the evidence from testing and evaluation?

- Does the student justify whether or not the project has met its aims?

## 6.1 Comments

# 7 Presentation

- Are all references correctly cited?

- Are there an adequate number of references?

- Is there a clear preference for archival sources over web pages?

- Are there any obvious spelling errors?

- Are there any obvious grammatical errors?

- Is the report well structured?

- Does the report have an introduction and a conclusion?

## 7.1 Comments
