<b>Foreword</b>	<b>xi</b>
<b>Acknowledgements</b>	<b>xvii</b>
<b>Authors' Biographies</b>	<b>xix</b>
<b>List of Contributors</b>	<b>xxv</b>
<b>1 The Power of Geographical Visualizations</b>	<b>1</b>
<i>Martin Dodge, Mary McDerby and Martin Turner</i>	
1.1 Aims	2
1.2 The nature of geographic visualization	2
1.3 The visualization process	4
1.4 Digital transition and geographic visualization	5
1.5 The politics of visualization	6
1.6 The utility of geographic visualization	8
1.7 Conclusions	8
References	9
<b>2 What does Google Earth Mean for the Social Sciences?</b>	<b>11</b>
<i>Michael F. Goodchild</i>	
2.1 Introduction	11
2.2 Major features of Google Earth	12
2.3 Fundamental spatial concepts	15
2.4 The social perspective	18
2.5 Research challenges	20
2.6 Conclusions	22
References	23
<b>3 Coordinated Multiple Views for Exploratory GeoVisualization</b>	<b>25</b>
<i>Jonathan C. Roberts</i>	
3.1 Introduction	25
3.2 Data preparation	28
3.3 Informative visualizations	31
3.4 Interaction and manipulation	34
3.5 Tools and toolkits	40

3.6	Conclusions	41
	References	42
<b>4</b>	<b>The Role of Map Animation for Geographic Visualization</b>	<b>49</b>
	<i>Mark Harrower</i>	
4.1	Introduction	49
4.2	Types of time	52
4.3	The nature of animated maps	53
4.4	Potential pitfalls of map animation	56
4.5	Conclusions	61
	References	62
<b>5</b>	<b>Telling an Old Story with New Maps</b>	<b>67</b>
	<i>Anna Barford and Danny Dorling</i>	
5.1	Introduction: re-visualizing our world	67
5.2	Method and content	68
5.3	The champagne glass of income distribution	105
	References	107
<b>6</b>	<b>Re-visiting the Use of Surrogate Walks for Exploring Local Geographies Using Non-immersive Multimedia</b>	<b>109</b>
	<i>William Cartwright</i>	
6.1	Introduction	109
6.2	Queenscliff Video Atlas	111
6.3	GeoExploratorium	113
6.4	Townsville GeoKnowledge Project	118
6.5	Jewell Area prototype	118
6.6	Melbourne Historical Buildings Demonstration Product	122
6.7	Testing the user's perception of space and place	123
6.8	Further development work	137
6.9	Conclusion	138
	Acknowledgements	138
	References	139
<b>7</b>	<b>Visualization with High-resolution Aerial Photography in Planning-related Property Research</b>	<b>141</b>
	<i>Scott Orford</i>	
7.1	Introduction	141
7.2	Applications of aerial photography in planning-related property research	148
7.3	Aerial photography, property and surveillance	152
7.4	Conclusion	155
	References	156
<b>8</b>	<b>Towards High-resolution Self-organizing Maps of Geographic Features</b>	<b>159</b>
	<i>André Skupin and Aude Esperbé</i>	
8.1	Introduction	159
8.2	Self-organizing maps	160
8.3	High-resolution SOM	162

## CONTENTS

ix

8.4	High-resolution SOM for Climate Attributes	166
8.5	Summary and outlook	179
	Acknowledgements	180
	References	180
<b>9</b>	<b>The Visual City</b>	<b>183</b>
	<i>Andy Hudson-Smith</i>	
9.1	The development of digital space	183
9.2	Creating place and space	184
9.3	Visual cities and the visual Earth	188
9.4	The development of virtual social space	192
9.5	The future: the personal city	196
	References	196
<b>10</b>	<b>Travails in the Third Dimension: a Critical Evaluation of Three-dimensional Geographical Visualization</b>	<b>199</b>
	<i>Ifan D H Shepherd</i>	
10.1	Introduction	199
10.2	What is gained by going from 2D to 3D?	201
10.3	Some problems with 3D views	204
10.4	Conclusions	217
	Acknowledgements	218
	References	218
<b>11</b>	<b>Experiences of Using State of the Art Immersive Technologies for Geographic Visualization</b>	<b>223</b>
	<i>Martin J. Turner and Mary J. McDerby</i>	
11.1	Introduction	223
11.2	The human visual system	224
11.3	Constructing large-scale visualization systems	232
11.4	Rules and recommendations	236
11.5	The future – a better and cheaper place	238
	References	239
<b>12</b>	<b>Landscape Visualization: Science and Art</b>	<b>241</b>
	<i>Gary Priestnall and Derek Hampson</i>	
12.1	Landscape visualization: contexts of use	241
12.2	The need for ground truth	242
12.3	Outcomes from fieldwork exercises	244
12.4	Broadening the context	246
12.5	The Chat Moss case study	247
12.6	Discussion	254
12.7	Conclusion	256
	Acknowledgements	257
	References	257
<b>13</b>	<b>Visualization, Data Sharing and Metadata</b>	<b>259</b>
	<i>Humphrey Southall</i>	
13.1	Introduction	259
13.2	The data documentation initiative and the aggregate data extension	260

13.3	Implementing the DDI within the GB Historical GIS	262
13.4	Driving visualization in <i>Vision of Britain</i>	267
13.5	Conclusion	273
	Acknowledgements	275
	References	275
<b>14</b>	<b>Making Uncertainty Usable: Approaches for Visualizing Uncertainty Information</b>	<b>277</b>
	<i>Stephanie Deitrick and Robert Edsall</i>	
14.1	Introduction: the need for representations of uncertainty	277
14.2	The complexity of uncertainty	278
14.3	Uncertainty visualization: a user-centred research agenda	286
14.4	Conclusion	288
	References	288
<b>15</b>	<b>Geovisualization and Time — New Opportunities for the Space–Time Cube</b>	<b>293</b>
	<i>Menno-Jan Kraak</i>	
15.1	Introduction	293
15.2	Hägerstrand’s time geography and the space–time cube	295
15.3	Basics of the space–time cube	296
15.4	The space–time cube at work	297
15.5	Discussion	303
	References	305
<b>16</b>	<b>Visualizing Data Gathered by Mobile Phones</b>	<b>307</b>
	<i>Michael A. E. Wright Leif, Oppermann and Mauricio Capra</i>	
16.1	Introduction	307
16.2	What are we visualizing?	308
16.3	How can we visualize this data?	309
16.4	Case studies	311
16.5	Discussion	314
16.6	Conclusion	316
	References	316
