## MANCHESTER MAPPING THE CITY

Manchester is one the world's most iconic cities. Not only was it the first industrial city, it can also claim to be the first post-industrial city. This sumptuously illustrated book is the first of its kind to use historic maps and unpublished plans to chart the dramatic growth and transformation of Manchester and its conurbation as it grew rich on the cotton trade from the late 18th century, experienced periods of boom and bust through the Victorian period and began its post-industrial transformation in the 20th century.

The Peterloo Massacre, the Bridgewater Canal, the railway revolution, Trafford Park industrial estate, the Ship Canal, Belle Vue theme park, Wythenshawe garden city, the 1996 IRA bomb, Coronation Street, iconic football stadiums, Salford Quays and MediaCity are just some of the events and places that are explored. *Manchester: Mapping the City* will appeal to all who are passionate about the city and its history as well as those with an interest in town planning, housing, transport and the history of maps.
