1 Introduction	9
2 Conclusions	11
A A Long Proof	13

List of Tables

1.1	This shows the attendance at my course over several years.	9
-----	--	---

List of Figures

1.1	A picture of a small dog.	10
-----	-----------------------------------	----

Abstract

Write your abstract here: Remember, it must fit on this A4 page and should describe contents of the thesis/dissertation. Here might also be a good place to indicate what you have achieved in the thesis/dissertation and, in the case of a PhD, what new results you have discovered. Note that for a PhD single-spacing is used throughout the Abstract, including displayed equations

$$e = mc^2$$

as for the above example.

Declaration

No portion of the work referred to in the dissertation has been submitted in support of an application for another degree or qualification of this or any other university or other institute of learning.

Intellectual Property Statement

- i.** The author of this dissertation (including any appendices and/or schedules to this dissertation) owns certain copyright or related rights in it (the “Copyright”) and s/he has given The University of Manchester certain rights to use such Copyright, including for administrative purposes.
- ii.** Copies of this dissertation, either in full or in extracts and whether in hard or electronic copy, may be made **only** in accordance with the Copyright, Designs and Patents Act 1988 (as amended) and regulations issued under it or, where appropriate, in accordance with licensing agreements which the University has entered into. This page must form part of any such copies made.
- iii.** The ownership of certain Copyright, patents, designs, trade marks and other intellectual property (the “Intellectual Property”) and any reproductions of copyright works in the dissertation, for example graphs and tables (“Reproductions”), which may be described in this dissertation, may not be owned by the author and may be owned by third parties. Such Intellectual Property and Reproductions cannot and must not be made available for use without the prior written permission of the owner(s) of the relevant Intellectual Property and/or Reproductions.
- iv.** Further information on the conditions under which disclosure, publication and commercialisation of this dissertation, the Copyright and any Intellectual Property and/or Reproductions described in it may take place is available in the University IP Policy (see <http://documents.manchester.ac.uk/DocuInfo.aspx?DocID=487>), in any relevant Dissertation restriction declarations deposited in the University Library, The University Library’s regulations (see <http://www.manchester.ac.uk/library/aboutus/regulations>) and in The University’s Guidance on Presentation of Dissertations.

Acknowledgements

I would like to thank...

Chapter 1

Introduction

The syntax for a tabular environment is as follows: $\begin{array}{c|cc} 1 & 2 & 3 \\ \hline \text{one} & \text{two} & \text{three} \end{array}$ and we carry on like this. A more complex table (copied from the [blog](#)) is

Now we can refer to the table by saying for example, in Table 1.1 we give some results of... as opposed in the table above we give some results.

Week	Attendance at Course		
	MATH10121	MATH10212	MATH10222
1	234	157	153
2	223	167	148
3	227	129	133
4	236	134	113
5	212	127	101

Table 1.1: This shows the attendance at my course over several years.

Figure 1.1: A picture of a small dog.

If I write a sentence
around the picture it takes it as part of the text.

To get a figure that can be referred to, we need to use a figure environment.

My first citation is to Black and Scholes (1973).

Chapter 2

Conclusions

And here is the final chapter showing how clever you are

Bibliography

Black, F. and Scholes, M. (1973). The pricing of options and corporate liabilities, *The journal of political economy* pp. 637–654.
