The Economics of Adjustment and Growth

Introduction and Overview

1 Consumption, Saving, and Investment

1. Consumption and Saving
   1.1 The Permanent Income Hypothesis
   1.2 The Life-Cycle Model
      1.2.1 The Basic Framework
      1.2.2 Age and the Dependency Ratio
   1.3 Other Determinants
      1.3.1 Income Levels and Income Uncertainty
      1.3.2 Intergenerational Links
      1.3.3 Liquidity Constraints
      1.3.4 Inflation and Macroeconomic Stability
      1.3.5 Government Saving
      1.3.6 The Debt Burden and Taxation
      1.3.7 Social Security, Pensions, and Insurance
      1.3.8 Changes in the Terms of Trade
      1.3.9 Financial Deepening
      1.3.10 Household and Corporate Saving
   1.4 Empirical Evidence

2. Investment
   2.1 The Flexible Accelerator
   2.2 The Cost of Capital
   2.3 Uncertainty and Irreversibility
   2.4 Other Determinants of Investment
      2.4.1 Credit Rationing
      2.4.2 Foreign Exchange Constraint
      2.4.3 The Real Exchange Rate
      2.4.4 Public Investment
      2.4.5 Macroeconomic Instability
      2.4.6 The Debt Burden Effect
   2.5 Empirical Evidence

3. Summary

Appendix--Income Uncertainty and Precautionary Saving
2 The Financial System, Money Demand, and Monetary Policy

1. The Financial System
   1.1 Financial Repression
   1.2 Banks and Financial Intermediation
2. Indirect Instruments of Monetary Policy
3. Credit Rationing
4. Monetary Policy in a Dollarized Economy
5. The Demand for Money
6. Summary
Appendix--Money Demand and Cointegration

3 Fiscal Deficits, Public Debt, and the Current Account

1. Structure of Public Finances
   1.1 Conventional Sources of Revenue and Expenditure
   1.2 Seigniorage and Inflationary Finance
   1.3 Quasi-Fiscal Activities and Contingent Liabilities
2. The Government Budget Constraint
3. Assessing the Stance of Fiscal Policy
4. Fiscal Imbalances and External Deficits
5. Consistency and Sustainability
   5.1 The Consistency Framework
   5.2 Fiscal and External Sustainability
6. Sustainability and the Solvency Constraint
7. Commodity Price Shocks and Fiscal Deficits
8. Public Debt and Fiscal Austerity
9. Summary
Appendix—The Generalized Solvency Constraint

4 Exchange Rate Regimes, Credibility and Exchange Rate Adjustment

1. The Nature of Exchange Rate Regimes
   1.1 A Basic Typology
   1.2 Currency Board Arrangements
   1.3 Exchange Rate Bands
2. Evidence on Exchange Rate Regimes
   2.1 General Trends
   2.2 Exchange Rate Bands
3. Choosing an Exchange Rate Regime
   3.1 Some Conceptual Issues
5 Inflation and Disinflation

1. Sources of Inflation
   1.1 Hyperinflation and Chronic Inflation
   1.2 Fiscal Deficits, Seigniorage and Inflation
   1.3 Other Sources of Chronic Inflation
      1.3.1 Wage Inertia
      1.3.2 Exchange Rates and the Terms of Trade
      1.3.3 The Frequency of Price Adjustment
      1.3.4 Food Prices
      1.3.5 Time Inconsistency and the Inflationary Bias
2. Nominal Anchors in Disinflation Money vs. the Exchange Rate
   2.1 Controllability and Effectiveness
   2.2 Adjustment Paths and Relative Costs
   2.3 Credibility, Fiscal Commitment, and Flexibility
   2.4 The Flexibilization Stage
3. Disinflation Programs: The Role of Credibility
   3.1 Sources of Credibility Problems
   3.2 Enhancing Credibility
      3.2.1 Big Bang and Gradualism
      3.2.2 Central Bank Independence
      3.2.3 Price Controls
      3.2.4 Aid as a Commitment Mechanism
4. Two Recent Stabilization Experiments
   4.1 Egypt, 1992-97
   4.2 Uganda, 1987-95
5. Summary

Appendix—Inflation Persistence and Policy Credibility

6 Capital Inflows: Causes and Policy Responses

1. The Surge in Capital Flows
2. Domestic and External Factors
3. How Volatile are Capital Flows?
4. Macroeconomic Effects
5. Policy Responses
   5.1 Sterilization
   5.2 Exchange Rate Flexibility
   5.3 Fiscal adjustment
   5.4 Capital Controls
   5.5 Statutory Reserve Requirements
   5.6 Other Policies Responses
5. Summary
Appendix--Measuring the Degree of Capital Mobility

7 Currency Crises and Financial Volatility

1. Sources of Exchange Rate Crises
   1.1 Inconsistent Fundamentals
   1.2 Rational Policymakers and Self-Fulfilling Factors
2. Currency Crises: Recent Experiences
   2.1 The 1994 Crisis of the Mexican Peso
   2.2 The Thai Baht Crisis
3. Currency and Banking Crises
4. Predicting Financial Crises
5. Sources and Effects of Financial Volatility
   5.1 Volatility of Capital Flows
   5.2 Herding Behavior and Contagion
   5.3 The Tequila Effect and the Asia Crisis
6. Coping with Financial Volatility
   6.1 Macroeconomic Discipline
   6.2 Information Disclosure
   6.3 The Tobin Tax
7. Summary
Appendix--The Mechanics of Speculative Attacks and the Interest Rate Defense

8 Aggregate Accounts, Budget Constraints, and Model Consistency

1. Production, Income, and Expenditure
2. A Consistency Accounting Matrix
   2.1 Current Account Transactions
   2.2 Capital Account Transactions
3. National Income Identities and Budget Constraints
   3.1 Gross Domestic Product and Absorption
   3.2 The Government Budget Constraint
   3.3 The Private Sector Budget Constraint
   3.4 The External Sector Budget Constraint
   3.5 The Balance Sheet of the Financial System
   3.6 The Savings-Investment Balance
4. A Three-Good Model with Banks
   4.1 Households
   4.2 Firms and the Labor Market
   4.3 Commercial Banks
   4.4 Government and the Central Bank
   4.5 Equilibrium Conditions
      4.5.1 The money market
      4.5.2 The credit market
      4.5.3 The market for home goods
   4.6 Graphical Solution
   4.7 Rise in the World Interest Rate
   4.8 Extensions
5. An Intertemporal Model of the Current Account
   5.1 Basic Structure
   5.2 Financial Openness
6. Summary
Appendix—The Real Exchange Rate and Aggregate Output

9 Policy Tools for Macroeconomic Analysis

1. Assessing Business Cycle Regularities
2. Assessing the Effects of External Shocks
3. Financial Programming
   3.1 The Polak Model
   3.2 An Extended Framework
4. The World Bank RMSM Model
5. The Merged Model and RMSM-X
   5.1 The Merged IMF-World Bank Model
   5.2 The RMSM-X Framework
6. Three-Gap Models
7. The 1-2-3 Model
   7.1 The “Minimal” Setup
   7.2 An Adverse Terms-of-Trade Shock
   7.3 Investment, Saving, and the Government
8. Lags and Behavioral Functions
9. Summary
10  Growth, Poverty, and Income Distribution: Some Basic Facts

1.  A Long-Run Perspective
2.  Some Simple Arithmetics
   2.1  Growth and Standards of Living
   2.2  How Fast Do Economies Catch Up?
3.  Some Basic Facts
   3.1  Output Growth, Factor Inputs, and Population
   3.2  Saving, Investment, and Growth
   3.3  Poverty and Growth
   3.4  Inequality, Growth, and Development
   3.5  Trade, Inflation, and Financial Deepening
4.  Summary

Appendix—Income Distribution and Polarization

11  Growth and Technological Progress: The Solow-Swan Model

1.  Basic Structure and Assumptions
2.  The Dynamics of Capital and Output
3.  A Digression on Low-Income Traps
4.  Population, Savings, and Steady-State Output
5.  The Speed of Adjustment
7.  Summary

Appendix--Dynamics of $k$, the Output Effect of $s$, and the Speed of Adjustment

12  Knowledge, Human Capital and Endogenous Growth

1.  The Accumulation of Knowledge
   1.1  Knowledge as a Buy-Product: Learning by Doing
   1.2  The Production of Knowledge
2.  Human Capital and Returns to Scale
   2.1  The Mankiw-Romer-Weil Model
   2.2  The AK Model
3.  Human Capital, Public Policy, and Growth
4.  Other Determinants of Growth
   4.1  Fiscal Policy
      4.1.1  Government Spending
      4.1.2  The Dual Effects of Taxation
4.1.3 Budget Deficits and Growth
4.2 Inflation and Macroeconomic Stability
4.3 Trade and Openness
4.4 Financial Development
4.5 Political Factors and Income Inequality
4.6 Institutions and the Allocation of Talent

5. Summary

Appendix—The Savings Trap and Coordination Failures

13 The Determinants of Economic Growth: An Empirical Overview

1. Growth Accounting
2. The East Asian “Miracle”
3. Growth Regressions and Convergence
   3.1 Diminishing Returns and Convergence
   3.2 Convergence and Cross-Section Regressions
   3.3 Testing the Mankiw-Romer-Weil Model
4. The Empirics of Growth: Econometric Issues
5. The Econometric Evidence: An Overview
   5.1 Saving, Physical and Human Capital
   5.2 Fiscal Policy
   5.3 Inflation and Macroeconomic Stability
   5.4 Financial Factors
   5.5 Openness to External Trade
   5.6 Political Variables and Income Inequality
6. Catching-up or Falling Behind?
7. Summary

14 Structural Adjustment: Agriculture, Trade, and the Labor Market

1. Price Reform in Agriculture
2. Trade Liberalization
   2.1 The Gains from Trade
   2.2 Recent Evidence on Trade Reforms
   2.3 Trade Reforms, Employment, and Wage Inequality
   2.4 Obstacles to Trade Reform
3. Trade and Regional Economic Integration
4. Reforming Labor Market
   4.1 Labor Markets in Developing Countries
      4.1.1 Basic Structure
4.1.2 Employment Distribution and Unemployment
4.1.3 Wage Formation and Labor Market Segmentation
4.1.4 Minimum Wages
4.1.5 Trade Unions and Bargaining Process
4.2 Labor Market Reforms and Flexibility
5. Summary
Appendix—Measuring Reforms: Structural Policy Indices

15 Fiscal and Financial Sector Reforms

1. Fiscal Adjustment
   1.1 Reforming Tax Systems
      1.1.1 The Excess Burden of Taxation
      1.1.2 Guidelines for Reforms
   1.2 Expenditure Control and Management
   1.3 Civil Service Reform
   1.4 Fiscal Decentralization
2. Pension Reform
3. Interest Rate Liberalization
4. Unification of Foreign Exchange Markets
   4.1 Implicit Export Taxation and Inflation
   4.2 An Extended Framework
   4.3 Jamaica’s Experience with Unification
   4.4 A Simple Formula
5. Financial Liberalization and Financial Fragility
   5.1 Sources of Financial Fragility
      5.1.1 Microeconomic and Institutional Failings
      5.1.2 Moral Hazard and Perverse Incentives
      5.1.3 Macroeconomic Instability
      5.1.4 Premature Financial Liberalization
   5.2 Strengthening Financial Systems
6. Summary
Appendix—Models of Tax Evasion

16 Adjustment and External Debt in Low-Income Countries

1. Growth, External Debt, and Adjustment
2. The Debt Overhang and the Debt Laffer Curve
3. Measuring the Debt Burden
4. Debt Rescheduling
5. The HIPC Debt Initiative
   5.1 First Stage
   5.2 Second Stage
   5.3 Eligibility Criteria and Prospects
6. Summary
Appendix—The Theory of Stages in the Balance of Payments

17 Sequencing, Gradualism, and the Political Economy of Adjustment

1. Stabilization and Structural Adjustment
2. The Order of Liberalization
   2.1 Liberalization of External Accounts
   2.2 Financial Reform and Capital Account
   2.3 Sequencing Labor Market Reforms
3. Political Constraints and Economic Reforms
   3.1 Modeling Political Conflict
   3.2 The Benefits of Crises
   3.3 Political Acceptability and Sustainability
4. Shock Treatment or Gradual Approach?
5. Summary
Appendix--The Costs of Corruption

Annex A: The Informal Sector and the Urban Labor Market
Annex B: Informal Financial Markets
Annex C: Exchange Market Unification
